

“In my company, the expectation for CERA is very high, and important tasks are assigned to CERAs, so it drives CERA numbers to higher growth.”

**Shinichiroh Choh**

Staff Actuary, Meiji Yasuda Life Insurance Company, Japan

## A CERA tells us their story

I felt the need to learn risk management systematically. Before starting to study for the qualification, I had studied technique and knowledge of risk measurement and risk management of the various fields. But as the need of the risk management increased, I began to think that I wanted to study it systematically from a wider and higher viewpoint.

CERA greatly contributes to the construction of principals of risk management. CERA is only the first step of a career as a risk manager, but it becomes the good pressure point to impose work of high quality as a professional.

In my company, the expectation for CERA is very high, and important tasks are assigned to CERAs, so it drives CERA numbers to higher growth.
